

The Joaquín Costa group visits Aitona and its peach trees in bloom

The Joaquín Costa social group of workers from the Vila-seca II factory in Ercros has visited the peach blossom fields in Aitona (Lleida), together with their families.

The day began with a walk through the fields of flowering trees, accompanied by a guide from the Fruiturisme entity, promoted by Aitona City Council, who explained to them the cultivation of fruit in the Segrià region.

Then, the group went to the town of Aitona where they took a guided tour through the main streets of this town, learning about its history and cultural traditions. The outing ended with a fellowship meal.
