

Ercros collaborates with Unicef to support children affected by earthquakes in Turkey and Syria

Ercros has collaborated with Unicef to support children affected by the earthquakes in Turkey and Syria. This contribution will enable to provide safe drinking water, vaccines, health and nutrition items, and school supplies, and to improve education and sanitation facilities.

This is Ercros' second collaboration for an emergency campaign promoted by Unicef, following the one it carried out in 2022 for the protection children's victims of the war in Ukraine.

In addition, Ercros and its staff regularly carry out volunteer campaigns with the Red Cross, Caritas, the Food Bank and the Seur Foundation.

With this new action, Ercros demonstrates its support for the human rights and contributes to improving the quality of life of children affected by natural disasters or armed conflicts.
