

Staff from the Ercros factory in Aranjuez visit the facilities of the Military Emergency Unit

A group of technicians and analysts from the control laboratory of the Ercros factory in Aranjuez have visited the facilities of the Military Emergency Unit (UME) in Torrejón de Ardoz. Months ago, UME personnel received training at the Ercros factory on the use of laboratory equipment.

During the visit, the Ercros staff was able to learn about the operation of the UME rapid identification laboratory, a mobile unit that allows analysis to be carried out on the field in case of emergencies. The attendants took advantage of the day to see the fighter jets that the military unit has in Torrejón de Ardoz.
