

The director of the pharmaceuticals division of Ercros participates in a discussion panel on the challenges of the pharmaceutical industry

Mari Carmen Cruzado, director of the pharmaceuticals division of Ercros, has participated as a speaker in the discussion panel “Main challenges of the API sector” organized by Farmaforum, the main Spanish fair in the sector, in which more than 200 companies in the pharmaceutical and biotechnology sector have been represented.

In her presentation, Mari Carmen Cruzado detailed the challenges faced by the active pharmaceutical ingredients (API) sector, such as: the increase in raw material costs, the instability of the supply chain or the increasingly complex talent retention.

Executives from other pharmaceutical companies, as well as representatives of the administration and professional associations, participated in the discussion panel.

The Ercros pharmaceuticals division, whose factory is located in Aranjuez, is dedicated to the production of antibiotics, exports more than 90% of its production and is a leader in the manufacture of fosfomicins, erythromycin and fusidic acid.
