

Aranjuez celebrates the International Day of Women and Girls in Science

Aranjuez workers concentrated in front of the factory

The Ercros factory in Aranjuez has celebrated the International Day of Women and Girls in Science with a five-minute concentration to claim their role in science, in which all the centre's workers have participated.

The director of the factory, Mari Carmen Cruzado, addressed a few words to the workers in which she defended their pride in being a woman and working in the scientific sector, and encouraged them to promote, in their immediate environment, the presence of women in technical studies.

All the information about equality in Ercros [here](#).
